

FRESHWATER CAST · MONDAY CAST

Jordan: Sunny Warm-Up, Short-Pool Dawn Windows & Tailwater Callouts

Jordan · Mitchell Dam tailwater · Bouldin (labeled callouts) Fri Oct 2 – Sun Oct 4, 2026

bank / kayak / boat Highs ~84° → ~87° → ~91° (BMX) CT clocks · mostly fair warming midweek

Release boards thin at evening pull Soft recreational · no named trail event pulled

Jordan draws sunny late-September weather climbing toward the low 90s. Pack sunscreen, fish first light on the short pool, and treat Mitchell Dam tailwater and Bouldin as labeled callouts with their own safety rules.

● MIDWEEK OUTLOOK

NWS Birmingham (BMX) band pin for **middle** paints this Friday–Sunday **Cast** window. At pull: A slight chance of rain showers between 10am and 1pm, then a chance of showers and thunderstorms. Mostly sunny. High near 86, with temperatures falling to around 82 in the afternoon. Southeast wind... Local clocks on this water run Central Time — dawn windows shift with the angler.

FRIDAY OCT 2

86°F slight chance rain showers then chance showers and thunderstorms · night ~69°F chance showers and thunderstorms. Winds 5 mph. Fish dawn and last light first when skies harden.

SATURDAY OCT 3

84°F showers and thunderstorms likely · night ~69°F showers and thunderstorms likely. Winds 0 to 5 mph. Fish dawn and last light first when skies harden.

SUNDAY OCT 4

74°F showers and thunderstorms · night
~66°F showers and thunderstorms. Winds 0
to 5 mph. Fish dawn and last light first when
skies harden.

HOW TO FISH THIS WEATHER

Unsettled air and shower/storm chances put
a premium on **pre-front and lull windows**.
Fish tighter to cover before cells; after a
pass, work muddy/clear seams and
windblown banks. Slide into creek arms if
lightning walks in.

Day cards from the locked weather-band representative pin (middle), pulled Friday morning for the
Fri–Sun window. Check live dam boards before you idle over a seam.

● GENERATOR SCHEDULE CHEAT SHEET

APC Jordan / Coosa lower-chain public generation calendars were **thin as a full Fri–Sun unit
block at evening pull**. Confirm APC pages before you idle near dam-end or tailwater structure.
Tailwater is boat-advanced when units run.

REACH	FRI–SUN NOTE	FAILOVER
Jordan main pool	Boards thin. Soft recreational midweek.	APC Jordan · public ramp boards
Mitchell Dam TW (callout)	Boards thin. Soft current language only when water is moving — restricted lines closed.	APC / posted TW signs
Bouldin (callout)	Labeled secondary. Confirm access and rules live.	APC / public access notices

Soft bite notes with quiet releases: points, grass, brush, and docks early; deeper edges and shade mid-day. If
water is moving at a dam face, look for bait on the first legal current break — still outside every restricted line.
Confirm ramp status before you trailer when pool has been swinging.

Practical pre-launch check: elevation versus last trip, ramp status on agency or park pages, and a
glance at any release remark. Birds and bait on the graph beat an empty calendar.

● HOW TO FISH IT — BANK / KAYAK / BOAT

BANK

Primary public bank access through **Jordan Lake State Ramp / Rotary Landing** area and posted parks — fees, parking, and hours verify live. Work riprap, docks, and shaded pockets at first light. Mitchell Dam tailwater and Bouldin are labeled callouts only.

Shared: hydrate on the climb toward the upper 80s–90s; stay outside dam restricted lines. Afternoon concrete gets hot fast — fish shade or quit to the truck.

Confirm ramp and park hours before you lock the truck. Soft midweek pressure until sunny Wednesday — leave margin before recreation stacks popular Jordan access.

KAYAK

Launch at the named public ramp when open; confirm ramp and parking before you strap the boat. Fish creek arms, grass flats, or protected banks away from main-channel ski traffic after mid-morning.

Wind on open water can end a kayak day early once recreational traffic builds — have a bailout shoreline planned. PFD on, whistle, and a sun kit every trip.

Pack a short rod for tight cover and a longer spinning setup for point casting. On the warmest Wednesday afternoon, abort open fetches early and finish along a protected bank rather than fighting wakes back to the ramp.

BOAT

Plan: **first light--~9 AM CT** on grass, docks, and points; late morning shade; mid-day deeper edges with electronics. Launch early at Jordan Lake State Ramp / Rotary Landing when open — confirm status before you trailer.

Soft APC language only when boards show units. Soft midweek pressure; sunny Wednesday traffic rises. Mark bait height at dawn before the first cast.

If units show later, fish the first legal current break only — still outside every restricted line. Leave open fetches early if Wednesday wakes stack.

● LURE BOX

TOP

Walking bait bone/chrome at dawn on points. Poppers over grass or brush on slick mornings. Buzzbait black/blue along shady banks evenings.

MID

Spinnerbait white/chartreuse on windy points. Squarebill citrus on riprap and docks. Soft swimbait for suspended fish mid-day.

BOTTOM

Green pumpkin creature in grass/brush. Brown football jig on point drops. Drop-shot shad pattern when water is clear under high sun.

● BASS LIFE STAGE

Late September on Jordan is a post-summer transition on a short pool. Largemouth still relate to docks, riprap, and pockets; current-oriented fish show when units are online.

Spawning is long done. Fish feed and comfort one morning at a time — cool nights pull fish shallow at first light; warm afternoons push them to shade and depth. Handle quickly in warm water.

● FORAGE THIS WEEK

Most likely menu: threadfin shad and bluegill around docks and riprap. Hatch reports are thin. Match the graph and birds.

● ALSO HOT / ALSO IN SEASON

Crappie on docks and brush. Catfish on deeper holes. Soft spotted-bass / current language when units run on legal water.

Crowd / Heavy Traffic: No named national trail event pulled for this water Mon Sep 28 – Wed Sep 30. Soft midweek recreational pressure under sunny skies; traffic rises on the warmest afternoons. Regs confirm live before you keep fish.

Looking ahead (next 1–3 weeks): Cooler October nights often sharpen dawn topwater. Keep pulling APC elevations and TW notices. Next **Cast:** Friday window Fri–Sun.

● PATTERN NOTES (THIS WEEK)

Late September on this water is still a feed-and-comfort game. Cooler nights pull fish shallow at first light; the afternoon rebound pushes them to shade, docks, grass edges, and deeper breaks unless generation moves bait into a legal current seam.

Start every morning by marking bait height on one trusted piece of structure before the first cast. If bait is up, open with a walking bait or spinnerbait; if bait is down, open with a jig, Texas-rig, or soft swimbait on the break. That single fork saves wasted hours chasing last week's memory.

When generation calendars stay thin, treat birds, bait on the graph, and ramp status as your live board. Soft unit language only when pages show water moving — and even then, fish outside every restricted line.

Crowd picture for Mon Sep 28 – Wed Sep 30: soft midweek recreational pressure under mostly sunny skies, rising on the warmest Wednesday afternoon. Get the dawn hour, then leave a margin before wakes and ski traffic stack popular corridors.

Regs, ramp fees, and park hours confirm live before you keep fish or lock the truck. This Cast is a plan for the water — not a substitute for the agency page you should glance at the night before.

● JORDAN MIDWEEK NOTES

Jordan's late-September pattern still leans on grass, docks, and current-related structure when boards show water moving. Check color at the ramp and match lure color before Wednesday's sun hardens the flat.

Electronics tip: mark bait height on a known grass edge or point at dawn. Soft APC language only when boards show units. Stay outside dam restricted lines.

Monday's cooler morning is the cleanest topwater window. Tuesday–Wednesday warm — shorten shallow and rotate to docks and deeper edges by late morning.

Line and leader: fluoro in the teens for grass; step down when clear water makes fish picky. Soft midweek pressure; sunny Wednesday traffic rises.

Mental picture: sunny dawn grass early in the week, then a hotter Wednesday shade bite with more boats after mid-morning.

If Wednesday opens calm, walk a bone bait down the first clean grass point; if chop builds, start spinnerbait on the windward edge.

Pack water, polarized lenses, and a shell looking ahead. Leave ramp margin before afternoon recreation stacks popular access.

Primary is largemouth; crappie and striped bass stay soft also-notes when bait stacks on seams.

● ON THE WATER THIS WINDOW

Treat dawn as the whole trip on the warmest days of this window. A clean first hour on a point, grass edge, seam, or creek mouth beats three hours of high-sun wandering.

Soft generation boards mean you fish structure and bait first; if water is moving at a dam face later, look for bait on the first legal current break — still outside every restricted line.

Decision fork: calm slick mornings open with a topwater or walking bait on the first clean bank you trust; breezy or wake-chop mornings open with a spinnerbait or soft swimbait along the windward edge, then rotate to shade. That fork covers most of this Cast without overthinking the box.

Primary this week is largemouth on grass and docks. Secondary species stay short also-notes only.

Confirm elevation vs last trip before you trailer. Birds and bait on the graph beat an empty calendar. Next Cast looks at the Friday window Fri–Sun with a fresh pull.

● WINDOW DISCIPLINE

Leave time margin for the ramp and the drive. Soft midweek pressure evaporates once afternoon recreation stacks popular corridors — especially on the sunny Wednesday rebound. Get the dawn hour right, then leave while the fishing is still good.

Practical pre-launch check: elevation vs last trip, ramp status on agency or park pages, and a glance at any release remark. Birds working a flat at dawn are the best free tip when calendars stay thin.

Hydrate early. Clear late-September sun puts UV and glare up after 9 AM — polarized lenses and longer casts help once surface glass burns off. Keep a rain shell even on fair midweek cards; looking ahead into Thursday can still bring storms on some corridors.
