

FRESHWATER CAST · MONDAY CAST · LOUISIANA

Caney Lake: Sunny Midweek Heat, Largemouth on Timber & Docks

Caney Lake · Fri Oct 2 – Sun Oct 4, 2026 · bank / kayak / boat · times in **CT** · primary: Largemouth bass

Fri ~88° → Sun ~81° (NWS SHV)

Fri–Sun window · CT

Heavy Traffic: none named Fri–Sun · expect weekend recreational pressure

Friday's chance showers and thunderstorms near 88°F give way to Saturday near 84°F (chance showers and thunderstorms) and Sunday near 81°F (chance rain showers) — fish the windows between weather, lean down on cover, and plan for weekend recreational pressure.

● WEEKEND OUTLOOK

NWS Shreveport (SHV) grid SHV 67,69 pulled Fri Oct 2, 2026 · ~6:40 AM CT. Friday high near **88°F** (Chance Showers And Thunderstorms); overnight low near **69°F**. Saturday near **84°F** (Chance Showers And Thunderstorms); Sunday near **81°F** (Chance Rain Showers). Numbers change — confirm before you launch.

FRIDAY OCT 2

88°F · Chance Showers And Thunderstorms · wind 0 to 5 mph E

Storm chances — fish protected banks and docks between cells; sit out lightning. Once cells clear, a short evening window can fire along riprap and shallow wood. Watch wind shifts after fronts (CT).

SATURDAY OCT 3

84°F · Chance Showers And Thunderstorms · wind 5 to 10 mph NE

Early leftover showers possible — fish the clean-up after 8 AM CT on secondary points and docks. High near 84°F; keep a rain shell and a slower bottom bait ready.

SUNDAY OCT 4

81°F · Chance Rain Showers · wind 5 to 10 mph NE

Showers in the mix — protected creek arms and docks between cells; skip open water if lightning. High near 81°F; evening bank bite can return as traffic softens (CT).

How to fish this weather

For **largemouth** (primary on Caney Lake this week): lead with docks, timber, riprap, and shade cover on sunny high-pressure days. Dawn shallow windows are the money; midweek heat makes midday picky — downsize and work deeper shade until evening. Keep presentations compact —

tubes, Ned rigs, jigs, and small swimbaits in craw and shad tones.

Hydrate on the hot banks. Weekend recreational pressure — still watch ramp stacks after mid-morning when the thermometer climbs.

● DAM & LEVEL CHEAT SHEET

THIN at pull Sun Sep 27, 2026 · ~10:50 PM CT. Use live elev/cfs from agency boards only — do not invent a unit schedule. Failover: LDWF / park Caney Creek lake notes · local ramp boards.

ZONE	LEVEL / FLOW NOTE	BITE NOTE
Chatham / north	THIN at pull — no dated elev on board	Public banks near Chatham / park access for dawn soft plastics along riprap and timber when posted open.
Main lake timber	THIN — verify live before you trailer	Standing timber and dock lines once any light breeze orients bait midweek.
Dam / south	THIN — Caney public boards THIN at pull	Dam-end public access where posted; skip restricted stilling water.

● HOW TO FISH IT — BANK / KAYAK / BOAT

BANK

Shared: Hot September dawns need water early; hydrate when midday climbs into the mid-90s. Skip private docks and closed park zones.

Caney Creek Lake / Chatham corridor public banks and pier edges where posted for dawn soft plastics on riprap and timber — fees verify live. **Day-use shore** midweek for shade docks when boat traffic returns. Dam restricted zones stay off-limits. Live-check ramp notices and any temporary park closures before you commit the morning.

KAYAK

Plan: Launch Chatham or posted public access and work protected creek arms and timber edges when any breeze puts chop on the main lake. PFD on the whole float; skip dam stilling / restricted water. Soft midweek recreational rebound — hug timber and keep a marked exit after 11 AM CT on the warmest days. Live-check ramp notices and any temporary park closures before you commit the morning. Give paddle traffic a wide berth near swim areas and courtesy docks.

BOAT

Plan: First light–10 AM CT on docks, timber edges, and creek mouths for active largemouth; late morning–afternoon graph points and brush when shad show; evening revisit shade banks as recreational traffic softens. Chatham and park ramps — weekday stacks lighter than weekends; watch ski lanes midweek and idle clear of swim lines. Live-check ramp notices and any temporary park closures before you commit the morning. Give paddle traffic a wide berth near swim areas and courtesy docks.

● LURE BOX

TOP

Walking bait (chrome / bone)
on calm dawn banks

Popper / buzz on shade
docks midweek

Spinnerbait (white /
chartreuse) along windward
timber

MID

3–4" swimbait (shad) on
points

Squarebill (craw / chartreuse)
ticking riprap

Jerkbait on clearer main-lake
edges

BOTTOM

Tube (green pumpkin) on rock
and docks

Ned / shaky when high
pressure gets picky

Football jig dragging points
and brush

Stain / clear match: Clarity unconfirmed this window. Lean craw / junebug in creek arms; chrome / white on clearer main-lake rock.

● LARGEMOUTH LIFE STAGE

Early-fall largemouth on Caney are sliding toward timber, docks, and creek-arm shade as nights cool only a little under this heat. Sunny high-pressure days favor a dawn shallow window and a pickier midday — downsize when the sun goes high. Match craw and shad profiles to clarity.

What's on the menu: Crayfish on rock and timber, shad and bluegill along creek mouths and docks. Hatch reports thin this week — fish what the graph and birds show.

● ALSO HOT / ALSO IN SEASON

CRAPPIE · BREAM

Crappie: brush and creek channels — minnows/jigs early and late. Bream: pads and shallow timber on a light float.

CATFISH

Channel cats on warm nights near deeper swings — cut bait. Confirm regs with LDWF.

● HEAVY TRAFFIC

No named national trail event pulled for Caney Lake Fri Oct 2 – Sun Oct 4 (calendars skimmed). Weekend recreational pressure; warmer midweek afternoons can thicken pleasure traffic after mid-morning. Still watch ramp stacks.

Treat the sunny Monday as a confidence dawn window — arrive early, fish shade and cover before the recreational stack builds, and leave a backup creek arm or timber pocket if main-lake ski traffic wakes up after lunch. Warm overnight lows keep fish shallow at first light; once the sun clears the trees, rotate to brushier shade lines instead of burning bright banks.

Local clocks on this product are labeled in the hero (CT). Ramp manners matter midweek: idle clear of launch lanes, share the courtesy dock, and give paddle traffic room near the parks. Any thunder still means off the water even on a sunny forecast. Carry spare terminal tackle — docks, timber, and riprap eat tubes and Ned heads faster than open-water days.

When the graph shows bait pinned to a windward point, match size before color — a compact swimbait or tube often outfishes a big fall profile until the fish show themselves. On bank days, rotate shade docks and timber seams instead of camping one corner all morning. Kayak anglers fish a triangle of two protected pockets and one secondary point so a lee option is always close.

Boat anglers should leave a margin before afternoon recreational lanes on the warm midweek days. Rising afternoon temperatures can make midday picky — downsize line, tip with a smaller trailer, and work deeper shade until the evening bank bite returns. Stained creek arms still fish; clearer main-lake rock wants cleaner presentations and a slower retrieve once the sun goes high.

A light rain shell still belongs in the boat if fog thickens before the sun burns it off, or if Wednesday's outlook teases later storms. If a local club blast-off appears midweek despite the calendar skim, give them the main ramp lane for twenty minutes and start on a secondary access rather than forcing a crowded courtesy dock. Keep the primary story on largemouth cover; secondary species are bonuses once you have a few fish in the well.

Pack a spare spool of fluorocarbon in the eight-to-twelve pound range for clearer edges and a slightly heavier braid leader when you punch brushy docks or timber. Re-tie after every big fish or snag — high-pressure sunny days punish a nick you would ignore under cloud cover. Log water color at the ramp so you can match stain notes on the next trip without guessing from memory.

Under bluebird midweek skies, commit to a short bait list before you leave the ramp: one walking or popping topwater for the calm dawn, one compact bottom bait for midday shade, and one reaction bait for any breeze that orients bait on points. Changing every ten casts under high pressure usually costs more fish than it finds on these Louisiana waters.

If morning fog hangs past sunrise, fish the first hour closer to the ramp instead of crossing open water blind. Once the sun burns through, expand to secondary points and windward timber. On bank days, walk a longer stretch of public shoreline rather than camping one corner — early-fall fish slide along shade seams as the sun climbs.

Carry polarized glasses for dock and timber peering under the bright midday sun — spotting bait or fish under floats often beats casting blind at every piling. Keep a soft exit if afternoon recreational traffic stacks near the main ramps, and give paddle traffic room near parks and swim areas.

Keep a soft exit if afternoon recreational traffic stacks near the main ramps on the warm midweek days, and give paddle traffic room near parks and swim areas. Confirm the NWS grid and a nearby METAR before you trailer — numbers change overnight even under a stable sunny pattern.

● LOOKING AHEAD

Warm sunny stretch into early next week, with storm chances climbing later in the week on the broader outlook — bank the Mon–Wed dawn windows while the pattern stays dry.

● PURE-GAS.ORG E0 · THIS WATER

Pure-Gas.org listings near this corridor for this Cast window (no prices — verify grade at the pump). Listings can change. None confirmed right at the Chatham ramp corridor at pull — Ruston / West Monroe are the practical fill stops on the drive.
