HOW TO FISH THIS WEATHER

MORNING

- Shallow cover, points, creek mouths
- **First light (6:34 AM EST) → ~9 AM**
- Use any ripple as cover

MIDDAY

- Shade lines, docks, deeper edges
- Electronics for bait height first
- Slow down once the sun is overhead

EVENING

- Revisit shallow shade as sun drops
- Topwater if the surface lays down
- Weekday traffic is lighter — work quiet pockets

FALL TRANSITION **Largemouth plan: Slow down: steep points, channel drops and remaining grass just outside the creeks, between the fall flats and the 15-30 ft winter depth; suspending jerkbait with long pauses, jig-and-pig or blade bait crawled down the slope.**

BIOLOGY

BASS STAGE

Largemouth are in the late fall transition — water under the mid-50s, so bass are sliding off the shallow flats toward steeper points and channel drops near their fall feeding areas.

Basis: water 50°F — USGS lake gauge 415026070563603 (Pumphouse On Assawompset Pond Near Lakev, 6 km), 24-h

NATURAL FORAGE

Afternoon, slide toward any sun-warmed pocket near the access and pitch a soft creature into shade under overhanging brush. The colder dawn is the softest paddle day of the window — ease around timber and legal dock shadows slowly.

ALSO BITING

Yellow perch & panfish. Cool nights pull perch and bluegill tighter to brush and the first drop.

PRESSURE

Weekday traffic — lighter than the weekend. Fish early, give ramps and swim areas room.

mean to Mon 4:20 AM; air record trending falling

WATER BOARD — LAKE CHEAT SHEET

FIXED Natural / small-impoundment water — no generation table. Check access rules and level notes with the managing agency before you go.

ITEM	NOTE	SOURCE
Clarity	Natural greens and browns match stained shore water; flash gets the nod on the windblown bank when baitfish are pushed shallow.	

ACCESS — BANK / KAYAK / BOAT

BANK

Start at the Long Pond public ramp (Lakeville/Freetown) and walk the nearest riprap, grass, or wood edge you can reach without crossing private docks. Afternoon, slide toward any sun-warmed pocket near the access and pitch a soft creature into shade under overhanging brush.

KAYAK

Launch from the public access at Long Pond (Lakeville/Freetown) and hug the protected shoreline as soon as you clear the ramp throat. The sun is fine for a short paddle, but keep the open middle for later if any breeze builds whitecaps on this compact water.

BOAT

Trailering boats use the same public access: Long Pond public ramp (Lakeville/Freetown). Confirm any length or motor notes on the posting at the ramp before you drop. Idle along the windward bank and keep casts short to wood and rock; save long runs or when the breeze dies.

LURE BOX

TOP

No topwater slot on file for this water — stay mid / bottom.

MID

No mid-depth slot on file for this water.

BOTTOM

Green-pumpkin stick worm. One on a bottom contact bait so you can switch without re-tying when the frost bite turns. Natural greens and browns match stained shore water.
